October 2018 - 2024

PROJECTS

Sales Management API, built with Python and Flask —

Github link – https://github.com/Gettco-o/Sales_Management_Api/

The sales management Api was developed with python and flask. Its Features includes custom role based identity and access management without third party saas platforms such as auth0, 0auth etc…

Coffee Shop API, built with Python and Flask —

Github link – https://github.com/Gettco-o/CoffeShop_api/

A coffee shop api written with flask. This API implements identity access and authorization using auth0.

SKILLS

AGILE PROJECT MANAGEMENT

PYTHON

FLASK

HTML

CSS

JAVASCRIPT

TYPESCRIPT

ANGULAR

TAILWIND CSS

LANGUAGES

English Language, Yoruba Language.

JSON Database in python —

Github link - https://github.com/Gettco-o/JSON_DATABASE/

This is a json file based database like system implemented in python. It stores data in json files and data can also be retrieved. The database implements basic CRUD operations.

Rest Countries Web App, built with Angular —

Github link - https://github.com/Gettco-o/RestCountries

Live link - https://gettco-restcountries.onrender.com

To display every country in the world or only those in a specific region, this project takes a json file from the "rest countries" api. Particular countries are also seen when clicked. The settings can be changed between dark and light.

Styles were applied using Tailwind CSS.

In this project, angular's use of rxjs observables, life cycle hooks, template-driven forms, routing, and http was covered.

Multi-Step form in HTML, CSS and JAVASCRIPT —

Github link - https://github.com/Gettco-o/Multistep_Form/

This project covered the basics of frontend web development with HTML, CSS and vanilla JAVASCRIPT. It is a simple multi-form page that allows one to register for a game subscription plan and displays all the details and the end.
